

## Solve each problem.

1) The complementary angle of $10^{\circ}$ is $\qquad$
2) The complementary angle of $28^{\circ}$ is $\qquad$
3) The complementary angle of $71^{\circ}$ is $\qquad$
4) The complementary angle of $72^{\circ}$ is $\qquad$
5) The complementary angle of $32^{\circ}$ is $\qquad$
6) The complementary angle of $24^{\circ}$ is $\qquad$
7) The complementary angle of $43^{\circ}$ is $\qquad$
8) The complementary angle of $88^{\circ}$ is $\qquad$
9) The complementary angle of $27^{\circ}$ is $\qquad$
10) The complementary angle of $46^{\circ}$ is $\qquad$
11) The supplementary angle of $176^{\circ}$ is $\qquad$
12) The supplementary angle of $11^{\circ}$ is $\qquad$
13) The supplementary angle of $157^{\circ}$ is $\qquad$
14) The supplementary angle of $160^{\circ}$ is $\qquad$
15) The supplementary angle of $161^{\circ}$ is $\qquad$
16) The supplementary angle of $111^{\circ}$ is $\qquad$
17) The supplementary angle of $179^{\circ}$ is $\qquad$
18) The supplementary angle of $110^{\circ}$ is $\qquad$
19) The supplementary angle of $153^{\circ}$ is $\qquad$
20) The supplementary angle of $101^{\circ}$ is $\qquad$
