

**Solve each problem.**

**Answers**

- 1) Isabel is making bead necklaces for her friends. She has sixteen beads and each necklace takes eight beads. How many necklaces can Isabel make?
- 2) Bianca received forty-eight dollars for her birthday. Later she found some toys that cost six dollars each. How many of the toys could she buy?
- 3) Janet had eighteen extra nickels. If she put them into stacks with nine in each stack, how many stacks could she make?
- 4) While playing basketball Team A scored thirty-two points. If each person scored four points, how many people were playing?
- 5) Faye's dad was taking everyone out to eat for her birthday. He paid twelve dollars for everyone. If each meal cost three bucks, how many people went?
- 6) There are twelve students going on a field trip. If each school van can hold two students, how many vans will they need?
- 7) An architect was building a hotel downtown. He built it with eighteen rooms total. If there are six rooms on each story how many stories tall is the hotel?
- 8) A store sold four of their newest toy, 'Silly Beans'. If they sold them to only two customers and each person bought the same amount, how many did each person buy?
- 9) Gwen had thirty-six quarters. If it costs nine quarters for each coke from a coke machine, how many could she buy?
- 10) Robin was helping her mom plant flowers and together they planted twenty-seven seeds. If they put three seeds in each flower bed, how many flower beds did they have?
- 11) A vase can hold seven flowers. If you had forty-nine flowers, how many vases would you need?
- 12) Cody had fifty-four bottles of water. If he drank six each day how many days would they last him?
- 13) Jerry's freezer had six ice cubes in it. If he had to get ice for two cups, how many pieces should he put in each cup to make them have the same amount?
- 14) Kaleb was playing dodgeball with his friends and scored fifty-six points. If he scored seven points each round, how many rounds did he play?
- 15) Katie was placing her pencils into rows with three pencils in each row. If she had nine pencils, how many rows could she make?
