

Solve each problem.

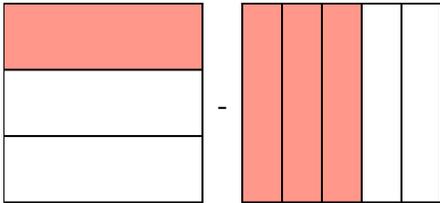

1) $\frac{7}{9} - \frac{2}{5} =$

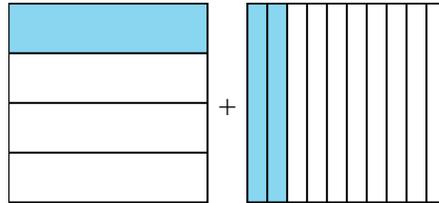

2) $\frac{2}{4} + \frac{2}{5} =$

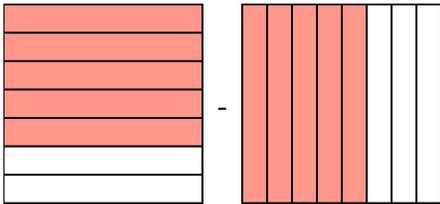

3) $\frac{3}{5} - \frac{1}{3} =$

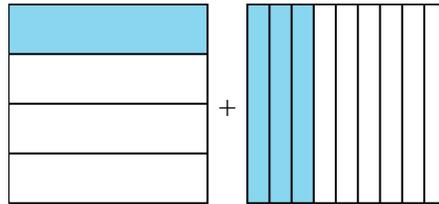

4) $\frac{1}{4} + \frac{2}{10} =$

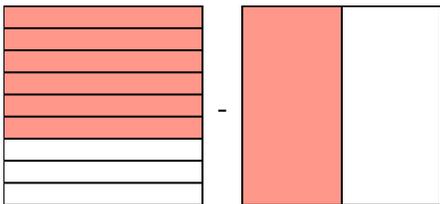

5) $\frac{5}{7} - \frac{5}{8} =$

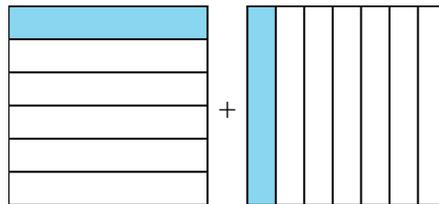

6) $\frac{3}{9} + \frac{1}{4} =$

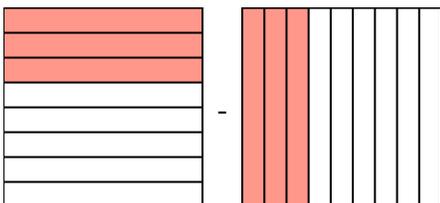

7) $\frac{6}{9} - \frac{1}{2} =$

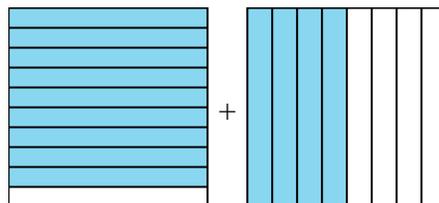

8) $\frac{1}{6} + \frac{1}{7} =$

9) $\frac{3}{8} - \frac{3}{9} =$

10) $\frac{9}{10} + \frac{4}{8} =$

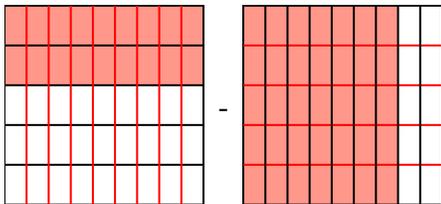

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

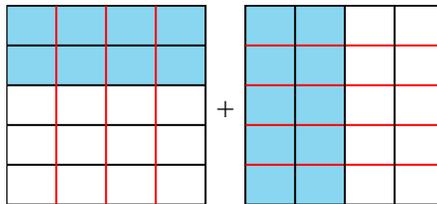

Solve each problem.

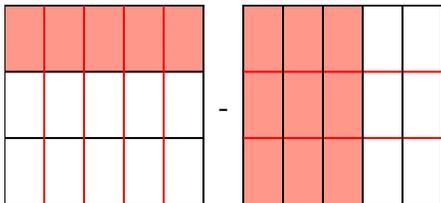

1) $\frac{7}{9} - \frac{2}{5} = \frac{35}{45} - \frac{18}{45} = \frac{17}{45}$

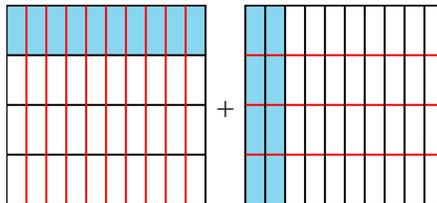

2) $\frac{2}{4} + \frac{2}{5} = \frac{10}{20} + \frac{8}{20} = \frac{18}{20}$

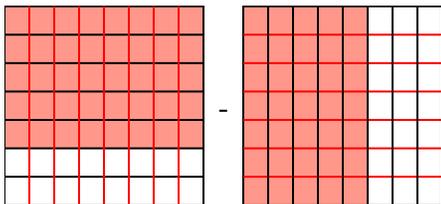

3) $\frac{3}{5} - \frac{1}{3} = \frac{9}{15} - \frac{5}{15} = \frac{4}{15}$

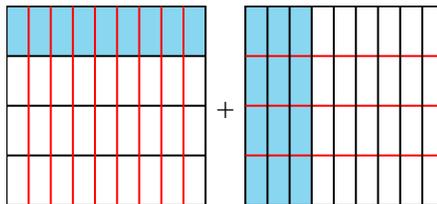

4) $\frac{1}{4} + \frac{2}{10} = \frac{5}{20} + \frac{4}{20} = \frac{9}{20}$

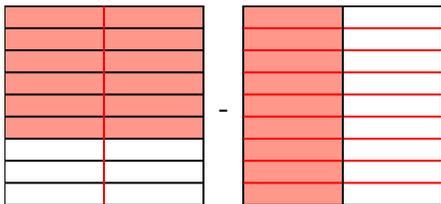

5) $\frac{5}{7} - \frac{5}{8} = \frac{40}{56} - \frac{35}{56} = \frac{5}{56}$

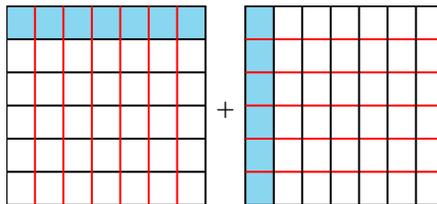

6) $\frac{3}{9} + \frac{1}{4} = \frac{12}{36} + \frac{9}{36} = \frac{21}{36}$

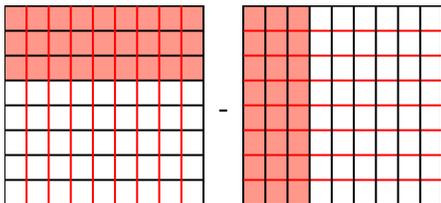

7) $\frac{6}{9} - \frac{1}{2} = \frac{12}{18} - \frac{9}{18} = \frac{3}{18}$

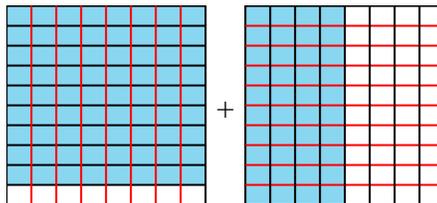

8) $\frac{1}{6} + \frac{1}{7} = \frac{7}{42} + \frac{6}{42} = \frac{13}{42}$

9) $\frac{3}{8} - \frac{3}{9} = \frac{27}{72} - \frac{24}{72} = \frac{3}{72}$

10) $\frac{9}{10} + \frac{4}{8} = \frac{36}{40} + \frac{20}{40} = 1\frac{16}{40}$

Answers

1. $\frac{17}{45}$
2. $\frac{18}{20}$
3. $\frac{4}{15}$
4. $\frac{9}{20}$
5. $\frac{5}{56}$
6. $\frac{21}{36}$
7. $\frac{3}{18}$
8. $\frac{13}{42}$
9. $\frac{3}{72}$
10. $1\frac{16}{40}$
