Two Step Problems

Name:

Solve each problem.

1) Haley uploaded sixteen pictures from her phone and nineteen from her camera to Facebook. If she sorted the pics into seven different albums with the same amount of pics in each album, how many pictures were in each of the albums?

2) While playing at the arcade, Paul won nineteen tickets playing 'whack a mole' and eleven tickets playing 'skee ball'. If he was trying to buy candy that cost six tickets a piece, how many could he buy?

3) A pet shelter had twenty-seven puppies when another forty-five were brought in. If eight puppies a day are adopted, how long would it take for all of them to be adopted?

4) Jerry was helping the cafeteria workers pick up lunch trays, but he could only carry nine trays at a time. If he had to pick up five trays from one table and forty-nine trays from another, how many trips will he make?

5) The school's debate team had eight boys and thirty-four girls on it. If they were split into groups of six how many groups could they make?

6) Janet was making baggies of cookies with four cookies in each bag. If she had eight chocolate chip cookies and four oatmeal cookies, how many baggies could she make?

7) A vase can hold six flowers. If you had fifteen carnations and twenty-one roses, how many vases would you need to hold the flowers?

8) For homework Vanessa had forty-eight math problems and six spelling problems. If she can finish six problems in an hour how long will it take her to finish all the problems?

9) Bianca's class is going on a field trip to the zoo. If each van can hold six people and there are fourteen students and thirty-four adults going, how many vans will they need?

10) Henry was organizing his baseball cards in a binder with eight on each page. If he had seventeen new cards and seven old cards to put in the binder, how many pages would he use?

Answers

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

7. _____

8. _____

9. _____

10. _____

1-10 | 90 | 80 | 70 | 60 | 50 | 40 | 30 | 20 | 10 | 0
