Two Step Problems   Name:

Solve each problem.

1) A vase can hold five flowers. If you had eleven carnations and nine roses, how many vases would you need to hold the flowers?

1. _____

2) Faye uploaded nine pictures from her phone and three from her camera to Facebook. If she sorted the pics into four different albums with the same amount of pics in each album, how many pictures were in each of the albums?

2. _____

3. _____

3) Emily and her friends were recycling paper for their class. For every six pounds they recycled they earned 1 point. If Emily recycled thirteen pounds and her friends recycled twenty-nine pounds, how many points did they earn?

4. _____

5. _____

4) Janet was making baggies of cookies with eight cookies in each bag. If she had twenty-nine chocolate chip cookies and eleven oatmeal cookies, how many baggies could she make?

6. _____

7. _____

5) Debby's old washing machine could only wash five pieces of clothing at a time. If she had to wash fifteen shirts and thirty sweaters how many loads would she have to do?

8. _____

9. _____

10. _____

6) George was helping the cafeteria workers pick up lunch trays, but he could only carry eight trays at a time. If he had to pick up five trays from one table and sixty-seven trays from another, how many trips will he make?

7) The school's debate team had fifteen boys and nine girls on it. If they were split into groups of six how many groups could they make?

8) A group of nine friends went into a restaurant. The chef already had thirteen chicken wings cooked but cooked fourteen more for the group. If they each got the same amount how many would each person get?

9) Edward made ten dollars mowing lawns and two dollars weed eating. If he only spent four dollar a week, how long would the money last him?

10) John had saved up four dollars. If he received another eleven dollars for his allowance, how many five dollar toys could he buy?
