

**Solve each problem.****Answers**

- 1) Vanessa was organizing her book case making sure each of the shelves had exactly three books on it. If she had four shelves of mystery books and six shelves of picture books, how many books did she have total?
- 2) While shopping for music online, Debby bought five country albums and three pop albums. Each album came with a lyric sheet and had eight songs. How many songs did Debby buy total?
- 3) A waiter had six tables he was waiting on, with seven women and two men at each table. How many customers total did the waiter have?
- 4) At Ned's Restaurant a group with four adults and four children came in to eat. If each meal cost eight dollars, how much was the bill?
- 5) Olivia had three pages of math homework and three pages of reading homework. If each page had five problems on it, how many problems did she have to complete total?
- 6) Oliver was collecting cans for recycling. On Saturday he filled seven bags up and on Sunday he filled three more bags. If each bag had eight cans in it, how many cans did he pick up total?
- 7) Cody and his friend were buying trick decks from the magic shop for four dollars each. How much did they spend if Cody bought six decks and his friend bought two decks?
- 8) Tiffany was unboxing some of her old winter clothes. She found eight boxes of clothing and inside each box there were five scarves and two mittens. How many pieces of winter clothing did Tiffany have total?
- 9) Janet was playing a video game where she scores three points for each treasure she finds. If she found eight treasures on the first level and two on the second, what would her score be?
- 10) While playing a trivia game, Mike answered three questions correct in the first half and seven questions correct in the second half. If each question was worth six points, what was his final score?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
