

**Solve each problem.****Answers**

- 1) A pet store had four siamese cats and twenty-nine house cats. During a sale they sold fifteen cats. How many cats do they have left?
- 2) Lana bought two coloring books. One had seven pictures and the other had forty. After one week she had already colored eighteen of the pictures. How many pictures does she still have to color?
- 3) At the school's book fair Ned bought five adventure books and twenty mystery books. If eleven of the books were used, how many new books did he buy?
- 4) Tiffany and her mom were picking carrots from their garden. Tiffany picked ten and her mother picked thirty-four. If only eighteen of the carrots were good, how many bad carrots did they have?
- 5) Oliver was trying to expand his game collection. He bought thirty-one games from a friend and bought twenty-nine more at a garage sale. If fifty of the games didn't work, how many good games did he end up with?
- 6) Jerry started his own lawn mowing business. In the spring he made nine dollars mowing lawns and in the summer he made forty-four dollars. If he had to spend fifteen dollars buying supplies, how much money did he end up with?
- 7) Bianca had twelve music files and forty-two video files on her flash drive. If she deleted eleven of the files, how many files were still on her flash drive?
- 8) Isabel had thirty-five math problems and eighteen science problems for homework. If she finished twenty-two of the problems at school, how many problems did she have to do for homework?
- 9) Gwen was playing a trivia game. In the first round she scored thirty-nine points and in the second round she scored nine points. In the last round she lost eleven points. How many points did she have at the end of the game?
- 10) A waiter at 'The Greasy Spoon' restaurant had forty-five customers to wait on. During the lunch rush he added another forty-two customers. If seventy of the customers didn't leave him a tip, how many customers did leave a tip?
