

**Solve each problem.****Answers**

- 1) A waiter at 'The Greasy Spoon' restaurant had three customers to wait on. During the lunch rush he added another thirty-four customers. If four of the customers didn't leave him a tip, how many customers did leave a tip?
- 2) Bianca had nineteen math problems and five science problems for homework. If she finished twelve of the problems at school, how many problems did she have to do for homework?
- 3) Sarah bought two coloring books. One had fourteen pictures and the other had fifteen. After one week she had already colored twenty-one of the pictures. How many pictures does she still have to color?
- 4) While on vacation, Gwen took twenty-seven pictures at the zoo and fifteen at the museum. If she later deleted thirty-five of the pictures, how many pictures from her vacation did she still have?
- 5) Lana picked twenty-four tulips and two roses to make flower bouquets. If she only used four of the flowers though, how many extra flowers did Lana pick?
- 6) At the school's book fair Jerry bought twenty-four adventure books and twenty-three mystery books. If fifteen of the books were used, how many new books did he buy?
- 7) Ned had to wash two short sleeve shirts and forty-one long sleeve shirts before school. If he had only washed eighteen of them by the time school started, how many did he not wash?
- 8) The school cafeteria ordered eleven red apples and seventeen green apples for student's lunches. But, if only nineteen students wanted fruit, how many extra did the cafeteria end up with?
- 9) A pet store had twenty-seven siamese cats and nine house cats. During a sale they sold sixteen cats. How many cats do they have left?
- 10) For Halloween Tiffany and her sister combined the candy they received. Tiffany had twenty pieces of candy while her sister had forty. If they ate thirty-three pieces the first night, how many pieces do they have left?
