

**Solve each problem.****Answers**

- 1) Tom had forty-four dollars. For his birthday he got fifteen more dollars but spent twenty-seven on a new game. How much money does he have now?
- 2) There were forty-two girls and two boys trying out for the school's basketball team. If only twenty-six of them got called back, how many students didn't make the cut?
- 3) Nancy picked forty tulips and sixteen roses to make flower bouquets. If she only used twenty-five of the flowers though, how many extra flowers did Nancy pick?
- 4) A pet store had nine siamese cats and forty-two house cats. During a sale they sold twenty-seven cats. How many cats do they have left?
- 5) Katie had thirty-six math problems and fourteen science problems for homework. If she finished forty of the problems at school, how many problems did she have to do for homework?
- 6) At the school's book fair Cody bought thirty-four adventure books and twelve mystery books. If five of the books were used, how many new books did he buy?
- 7) John had to wash three short sleeve shirts and forty-two long sleeve shirts before school. If he had only washed thirty-seven of them by the time school started, how many did he not wash?
- 8) At the arcade, George won seven tickets playing 'whack a mole' and twelve tickets playing 'skee ball'. If he spent fourteen of his tickets on a hat, how many tickets does George have left?
- 9) Lana bought two coloring books. One had twenty-eight pictures and the other had twenty-seven. After one week she had already colored fifty-four of the pictures. How many pictures does she still have to color?
- 10) Roger started his own lawn mowing business. In the spring he made forty-three dollars mowing lawns and in the summer he made two dollars. If he had to spend six dollars buying supplies, how much money did he end up with?
