

**Determine which choice shows the expression used to solve the problem.****Answers**

- 1) Henry was yard sale shopping. At the first yard sale he bought seven video games. At the next yard sale he bought nine more. How many did he buy total?  
A.  $7 + 9$                       B.  $9 - 7$                       C.  $7 \times 9$                       D.  $9 \div 7$
- 2) Adam was yard sale shopping. He ended up buying thirteen video games, but only four of them worked. How many bad games did he buy?  
A.  $13 + 4$                       B.  $13 - 4$                       C.  $13 \times 4$                       D.  $13 \div 4$
- 3) There are eighteen students in a class. If the teacher put them into groups with three students in each group, how many groups would she have?  
A.  $18 + 3$                       B.  $18 - 3$                       C.  $18 \times 3$                       D.  $18 \div 3$
- 4) The mailman delivered thirteen pieces of mail to a house. If six of the pieces were junkmail, how many pieces were actually good?  
A.  $13 + 6$                       B.  $13 - 6$                       C.  $13 \times 6$                       D.  $13 \div 6$
- 5) Luke was reading through his favorite book series. The first week he read seven different books. The next week he read three books. How many books did he read total?  
A.  $7 + 3$                       B.  $7 - 3$                       C.  $7 \times 3$                       D.  $7 \div 3$
- 6) Janet had to complete six pages of math homework and two pages of reading homework. How many pages did she have to complete total?  
A.  $6 + 2$                       B.  $6 - 2$                       C.  $6 \times 2$                       D.  $6 \div 2$
- 7) A pet store had two different types of cats. They had six house cats and they had nine siamese cats. How many cats did they have total?  
A.  $6 + 9$                       B.  $9 - 6$                       C.  $6 \times 9$                       D.  $9 \div 6$
- 8) Vanessa uploaded fifty-six pics to Facebook. If she put the pics into seven albums with the same number of photos in each album, how many photos were in each album?  
A.  $56 + 7$                       B.  $56 - 7$                       C.  $56 \times 7$                       D.  $56 \div 7$
- 9) Robin is making bead necklaces for her friends. She has forty-two beads and each necklace takes six beads. How many necklaces can Robin make?  
A.  $42 + 6$                       B.  $42 - 6$                       C.  $42 \times 6$                       D.  $42 \div 6$
- 10) Maria was trying to sell ten of her old DVDs. If she only sold four of them, how many did she have left?  
A.  $10 + 4$                       B.  $10 - 4$                       C.  $10 \times 4$                       D.  $10 \div 4$
