Two Step Problems

Name: _____

Solve each problem.

1) At lunch a waiter had eleven customers and five of them didn't leave a tip. If he got $six each from the ones who did tip, how much money did he earn?

2) Adam earned five dollars for each lawn he mowed. If he had twelve lawns to mow, but forgot to mow nine of them, how much money did he actually earn?

3) April's discount flowers was having a sale where each rose was eight dollars. If April started with fifteen roses and had eight roses left, how much money did she earn?

4) A worksheet had four problems on it. If a teacher had thirteen worksheets to grade and had already graded eight of them, how many more problems does she have to grade?

5) At a restaurant each adult meal costs $four and kids eat free. If a group of ten people came in and five were kids, how much would it cost for the group to eat?

6) A chef needs twelve potatoes for a meal. He has already cooked four. If each potato takes two minutes to cook, how long will it take him to cook the rest?

7) At the fair Paul bought eleven tickets. After riding the ferris wheel he had nine tickets left. If each ticket cost eight dollars, how much money did Paul spend riding the ferris wheel?

8) Frank had three action figures, but needed twelve total for a complete collection. If each one costs $seven, how much money would he need to finish his collection?

9) A painter needed to paint fourteen rooms in a building. Each room takes five hours to paint. If he already painted six rooms, how much longer will he take to paint the rest?

10) Amy earned nine points for each bag of cans she recycled. If she had thirteen bags, but didn't recycle seven of them, how many points would she have earned?
