

**Solve each problem.****Answers**

- 1) A worksheet had seven problems on it. If a teacher had fourteen worksheets to grade and had already graded six of them, how many more problems does she have to grade?
- 2) Ned earned five dollars for each lawn he mowed. If he had six lawns to mow, but forgot to mow two of them, how much money did he actually earn?
- 3) April's discount flowers was having a sale where each rose was four dollars. If April started with fourteen roses and had eight roses left, how much money did she earn?
- 4) At the fair Luke bought eleven tickets. After riding the ferris wheel he had two tickets left. If each ticket cost nine dollars, how much money did Luke spend riding the ferris wheel?
- 5) Each chocolate bar in a box cost \$two. If a box had sixteen bars total and Sarah sold all but eight bars, how much money would she have made?
- 6) A new building needed sixteen windows. The builder had already installed nine of them. If it takes four hours to install each window, how long will it take him to install the rest?
- 7) Frank bought sixteen boxes of chocolate candy and gave nine to his little brother. If each box has six pieces inside it, how many pieces did Frank still have?
- 8) A painter needed to paint fourteen rooms in a building. Each room takes three hours to paint. If he already painted six rooms, how much longer will he take to paint the rest?
- 9) At lunch a waiter had nine customers and three of them didn't leave a tip. If he got \$seven each from the ones who did tip, how much money did he earn?
- 10) Jerry invited four friends to a birthday party, but two couldn't come. If he wanted to buy enough cupcakes so each person could have exactly three, how many should he buy?
