

Solve each problem.

1) An ad agency was trying to determine if customers liked blue, green or red packaging better. To do this they took a sample of customers and polled them. The results are shown below:

Array #	1	2	3	4	5	6
Red	52	48	52	50	50	49
Green	48	49	49	48	49	49
Blue	48	50	48	50	52	48

Based on the information presented can you infer anything about which color is liked the best?

2) At the football game a vendor was trying to determine if Coke or Pepsi sold better. To do this he asked several rows of attendees which flavor they bought. His results are shown below:

Array #	1	2	3	4	5
Coke	53	50	53	50	51
Pepsi	58	60	61	61	61

Based on the information presented what can you infer about the types of soda sold?

3) An animal control employee wanted to estimate how many people owned cats and how many owned dogs. To do this he polled the first few houses in several neighborhoods. His findings are shown below:

Array #	1	2	3	4	5	6
Dog	7	4	5	5	7	6
Cat	6	5	4	6	4	3

Based on the information presented what can you infer about which type of pets there are?

Solve each problem.

1) An ad agency was trying to determine if customers liked blue, green or red packaging better. To do this they took a sample of customers and polled them. The results are shown below:

Array #	1	2	3	4	5	6
Red	52	48	52	50	50	49
Green	48	49	49	48	49	49
Blue	48	50	48	50	52	48

Based on the information presented can you infer anything about which color is liked the best?

Because of the very small discrepancy in the quantities it is unlikely any deduction can be made about the color customers liked.

2) At the football game a vendor was trying to determine if Coke or Pepsi sold better. To do this he asked several rows of attendees which flavor they bought. His results are shown below:

Array #	1	2	3	4	5
Coke	53	50	53	50	51
Pepsi	58	60	61	61	61

Based on the information presented what can you infer about the types of soda sold?

Based on the information presented the sales of Pepsi will be 14% higher than Coke.

3) An animal control employee wanted to estimate how many people owned cats and how many owned dogs. To do this he polled the first few houses in several neighborhoods. His findings are shown below:

Array #	1	2	3	4	5	6
Dog	7	4	5	5	7	6
Cat	6	5	4	6	4	3

Based on the information presented what can you infer about which type of pets there are?

Based on the information presented and the small samples gathered it is impossible to make any meaningful assumptions.
