# Division With Tape Diagram

Name:

Solve each problem.

1) A recycling company had thirty-nine pounds of material to sort. To make it easier they split them into boxes with each full box having four pounds, how many full boxes did they have?
39

2) Bianca had forty-six pennies. She wanted to place the pennies into five stacks, with the same amount in each stack. How many more pennies would she need so all the stacks would be equal?
46

3) Frank bought thirty-three pieces of candy to give to four of his friends. If he wants to give each friend the same amount, how many pieces would he have left over?
33

4) A pizza store had thirty-seven pieces of pepperoni to put on their pizzas. If each pizza got three pieces, how many extra pieces of pepperoni would they have?

37

5) A botanist picked thirty-eight flowers. She wanted to put them into six bouquets with the same number of flowers in each. How many more should she pick so she doesn't have any extra?
38

6) Victor has to sell thirty chocolate bars to win a trip. If each box contains seven chocolate bars, how many boxes will he need to sell to win the trip?
30

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____
