Examining Two Values Relative Size Name:

Solve each problem.

1) Given the numbers 45 and 42, how much would you need to subtract from the larger number to make it less than the smaller number?

2) Given the numbers 23 and 22, how much would you need to add to the smaller number to make it greater than the larger number?

3) Given the numbers 53 and 73, how much would you need to add to the smaller number to make it greater than the larger number?

4) Given the numbers 49 and 87, how much would you need to subtract from the larger number to make it less than the smaller number?

5) Given the numbers 83 and 72, how much would you need to add to the smaller number to make it greater than the larger number?

6) Given the numbers 72 and 43, how much would you need to subtract from the larger number to make it even with the smaller number?

7) Given the numbers 31 and 26, how much would you need to subtract from the larger number to make it even with the smaller number?

8) Given the numbers 74 and 58, how much would you need to add to the smaller number to make it greater than the larger number?

9) Given the numbers 45 and 55, how much would you need to add to the smaller number to make it greater than the larger number?

10) Given the numbers 15 and 55, how much would you need to add to the smaller number to make it even with the larger number?

11) Given the numbers 91 and 83, how much would you need to subtract from the larger number to make it less than the smaller number?

12) Given the numbers 83 and 34, how much would you need to add to the smaller number to make it even with the larger number?

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____

1-10	92	83	75	67	58	50	42	33	25	17
11-12	8	0
